300 EAST BLACK CREEK ROAD

Type: ROUTINE INSPECTION
Date: Dec-16-2010

EAST EARL, PA 17519

3.1 (a)

HOUSING FACILITIES, GENERAL.

Structure; construction. Housing facilities for dogs must be designed and constructed so that they are structurally sound. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

The following structural items were noted on this inspection:

(1) The linoleum is curling up along the west wall exposing the wooden floor in the upper indoor dog room.
(2) There is a section of plywood floor which has popped up in the hallway in the outdoor shed building.

The floor needs to be be repaired in the above two locations to allow for cleaning and to restrict pests from entering.
To be corrected by: Dec. 23, 2010

3.1 (e)

HOUSING FACILITIES, GENERAL.

Storage. Supplies of food and bedding must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies. All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage.

There is an open bag of dog food on the floor in the outdoor shed building. All open supplies of food need to be stored in leakproof containers with lids to protect supplies from contamination.
To be corrected by: Dec. 20, 2010

An exit briefing was conducted with facility representative.

3.11 (d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Pest control. An effective program for the control of insects, external parasites affecting dogs and cats, and birds and mammals that are pests, must be established and maintained so as to promote the health and well-being of the animals and reduce contamination by pests in animal areas.

There are small flies accumulating in front of the outdoor runs by the gravel. An effective control for flies is needed in this area. Keeping the gravel area free of wet bedding and debris should help with the fly problem. This item affects 21 dogs.

EAST EARL, PA 17519

2.40 (b) (2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Each dealer shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries.

Two boxers in the outdoor kennel were observed with long toenails in need of trimming. Toenails need to be trimmed to prevent foot problems.
To be corrected by: August 14, 2009

3.6 (a) (2) (i)

PRIMARY ENCLOSURES.

Primary enclosures must be constructed and maintained so that they have no sharp points or edges that could injure the dogs.

Outdoor enclosure housing 2 labrador retrievers and 1 labradoodle has a hole in the chink-link wire above the water bowl on the front door. Wire is bent around the hole. Chain-link wire needs to be repaired to prevent possible injury to the dogs.
To be corrected by: August 15, 2009.

2.75 (a) (1) (iv)

RECORDS: DEALERS AND EXHIBITORS.

The records shall include the name and address of the person to whom a dog or cat was sold or given and that person's license or registration number if he or she is licensed or registered under the Act.

The buyers address was incomplete on several of the sale forms for 2008. The full address of the buyer must be recorded on sale forms(APHIS form 7006) to document changes in ownership and to keep track of animals.
To be corrected by: December 12, 2008

Animal inventory: 251 dogs & 27 weaned puppies
